

Russell Dudek

Division IT Transformation Leader | AI-First Operations | Manufacturing Systems, Data Governance, and Execution

Pittsburgh, PA | 412.287.8640 | russelldudek@gmail.com | linkedin.com/in/russelldudek | https://russelldudek.github.io/AMETEK/

PROFESSIONAL SUMMARY

AI transformation and operations leader with 20+ years across manufacturing, logistics, robotics, customer operations, field technology, ERP-adjacent workflows, and executive operating systems. Strongest where decentralized teams need a common operating spine: clean process ownership, usable data, disciplined governance, practical automation, and human adoption. Builds the translation layer between business reality and technology execution so transformation becomes visible, measurable, and durable.

Selected Scale | 1,000+ deployed machines supported | 5M annual second-day orders | 99.98% on-time delivery | 100% FAA safety record | Led 1,000+ Amazon employees | 20+ years operations

AMETEK P&AI; RELEVANCE

- Built operating cadence across production, quality, purchasing, support, engineering, training, customer operations, and leadership reporting.
- Converted scattered operational knowledge into SOPs, dashboards, escalation paths, onboarding flows, and AI-assisted review loops.
- Designed human-in-the-loop AI systems where leaders can see evidence, decision gates, ownership, and operational risk before it becomes noise.
- Led high-pressure launch and scale work where customer promise, quality discipline, safety, staffing, and daily metrics had to align.
- Brings a business-first IT posture: standardize the core where variance adds cost, preserve local autonomy where it creates real advantage.

PROFESSIONAL EXPERIENCE

Director of Operations | Vape-Jet / PDX Tech Services | Pittsburgh, PA / Remote | 2025 - Present

Lead AI-first operating transformation for a software-enabled hardware company moving through scale, relocation, manufacturing change, and customer-support complexity.

- Built an AI fabric across operations, GTM, product, software, HR, ERP/Odoo workflows, Jira, fleet intelligence, and leadership reporting.
- Prepared West Coast operations for scale while architecting and launching a new East Coast HQ for distributed manufacturing and support.
- Advanced proactive support for 1,000+ machines using telemetry, throughput patterns, hidden error signals, and AI-assisted review.
- Protected customer trust by turning support pain into clearer engineering, service, production, documentation, and training priorities.
- Created purchasing-control and Odoo-based planning infrastructure to make BOM, inventory, incoming, vendor, shortage, and sourcing decisions visible.
- Built department hubs, review artifacts, escalation paths, and standard work that reduced dependence on individual memory.

Founder / AI Transformation Advisor | DudeWorth | Pittsburgh, PA / Remote | 2017 - Present

Build human plus AI operating systems for strategy, decision support, workflow automation, and governed adoption.

- Built DudeXOS with Core as an agentic harness for research, decision records, QA checks, operating artifacts, and executive workflow support.
- Designed AI adoption methods around real work: leadership alignment, policy, training, metrics, human review, and continuous improvement loops.
- Created practical AI-supported systems for funnel strategy, knowledge capture, reporting cadence, workflow design, and business development.
- Translate AI concepts into operating patterns that improve judgment, visibility, accountability, and trust rather than novelty output.

Regional Director | Cardinal Building Products | Pittsburgh, PA | 2021 - 2023

Built and led a remote regional operation across customers, digital systems, logistics, and operating cadence.

- Strengthened major customer relationships, follow-up cadence, sales coordination, fulfillment support, and regional accountability.
- Advanced route planning, CRM, digital marketing, online buying, and regional operating model concepts.
- Built remote operating rhythms that kept customer work, internal handoffs, and leadership visibility moving through change.

Chief Pilot, Autonomous Systems and Aerial Data Operations | ZeusVu | Pittsburgh, PA | 2018 - 2022

Led FAA-compliant aerial data operations and autonomous systems concepts.

- Maintained a 100% safety record with no FAA incidents in complex operating environments.
- Developed TensorFlow machine vision concepts for inventory and field intelligence.
- Connected drone operations, field data, photogrammetry, restricted-airspace planning, and autonomous delivery concepts.

Operations Management / Site Leader | Amazon | Pittsburgh, PA | 2014 - 2018

Launched Amazon Prime Pittsburgh, supporting roughly 5M second-day orders annually.

- Achieved 99.98% on-time delivery through cadence, escalation, staffing models, and daily performance discipline.
- Led and developed 1,000+ Amazon employees through launch, peak volume, daily execution, and performance cadence.
- Built launch rhythms for staffing, safety, throughput, quality, escalation, and customer-promise execution.
- Worked across robotics, Prime Air, Amazon Flex, Prime Day, proof-of-delivery, and sortation practices.

Director of Operations and Engineering Management | Compunetics | Pittsburgh, PA | 2000 - 2013

Led engineering, production, quality, and process systems in high-reliability electronics manufacturing.

- Built operating systems for aerospace, defense, medical, semiconductor, and high-reliability electronics markets.
- Led cross-functional technical teams where engineering judgment, quality discipline, and production reality had to align.
- Applied Lean Six Sigma, root-cause analysis, AS9001, MIL-PRF-31032, SOPs, and technical customer translation.

EDUCATION, CERTIFICATIONS, AND TECHNICAL SKILLS

Education | Bachelor of Science, University of Pittsburgh | Business Entrepreneurship, Pennsylvania University

Certifications | IBM Enterprise Design Thinking Practitioner | Google AI Essentials | Six Sigma Certification | OSHA 10

Skills | Division IT Strategy | AI Transformation | ERP/Odoo Workflows | SAP S/4HANA Transformation Governance | Manufacturing Operations | Data Governance | Cyber Resilience Operating Cadence | M&A; Integration Readiness | Workflow Automation | Jira | Knowledge Management | KPI Design | Executive Facilitation | Customer Support Intelligence | Robotics | Supply Chain | Lean Six Sigma | Quality Systems | Python | SQL
